

POP-UP FESTIVAL

Tech Attack Facts

Babies need 3 things the most: to have their senses stimulated, to be fed and to be made to feel safe

Babies really only experience 2 emotional states: calm and stress

Toddlers are starting to be able to feel more emotions but they don't know how to recognize and regulate them yet

Tweens spend a lot of time thinking about themselves

Tweens really want to do what feels good

Tweens are learning to focus and pay attention

Tween are testing out their independence

Tweens want their parents to start giving them more responsibilities

POP-UP FESTIVAL

Tech Attack Facts

Toddler brains are starting to learn the rules of the world; how we play, how we eat, how we behave at home or differently outside

Babies learn to pay attention to whatever grown-ups pay attention to

Tweens really want to fit in

Tween bodies are changing and they want to know how other kids their age are experiencing these changes too

Tweens spend a lot of time thinking about themselves

Tween moods start to change

Teens want more privacy

Teens emotions start getting really strong and powerful, but are still hard to control

POP-UP FESTIVAL

Tech Attack Facts

Babies are born with 100 billion neurons - that's the same as the number of stars in the Milky Way!

Baby's 100B neurons will help them learn to speak, feel things on their skin, know hunger, develop sense of smell and sight.

Babies' brains need grown ups to give them lots of healthy food, cuddles, eye-contact and lots of talking/singing/reading time
